Community Involvement

- Member-Board of Directors- Settle the Debt
 - Settle the debt is a not for profit organization dedicated to paying off school lunch debt for children in need. During the pandemic we have pivoted to providing support to local food banks as they work to ensure that area children are receiving the healthy food they

need.

- My role on the board of directors includes organizing fundraising efforts directed at local businesses, determining proper allocation of funds, administration and record keeping.
- In addition, I have routinely donated personally and my practice has donated over \$12,000 to support hungry kids.
- 02/23/2018- Participated in GKAS day providing free preventive and restorative care to children in need.
